3 of 3 people found the following review helpful. The new gold standard!By Sonia719This is my third book by Logi-Puzzles. They never fail to deliver the best experience in this type of puzzle. I consider myself an intermediate puzzle solver and even the easier ones present some challenge. The resulting pictures are beautiful, you never have to guess at what it is like some others of this type. A few tips: I found Crayola Erasable Colored Pencils and use them for pixelated puzzles. It makes the black and whites a bit more fun and also eliminates the graphite from getting all over your hand as you move across the page. Also, I have found that this type of puzzle is know by a myriad of names: Japanese puzzles, Hanjie, Griddlers, Nonograms, Pixel Puzzles, and Logic Art. That said, do yourself a favor and get every one of the books by Logi-Puzzles. You're in for a real treat!3 of 3 people found the following review helpful. OK book but small gridsBy DatasafetyI found the puzzles to be a little smaller than expected. The printing is very light and the boxes are very small compared to the similarly sized books by O'Ekaki (Kenji Onishi). There is room on

the page to expand the puzzle size so I'm not sure why they need to be so small. 0 of 0 people found the following review helpful. Logical and stimulating
By tuffil
One of the math teachers at our school got me into this puzzle. He had his students doing them and I was intrigued and I blame him for my "addiction". I really am hooked on this type of puzzle and the ones I have been doing are from books from Japan. I decided to try this to see if it was similar and it is. I am so glad to have found this book and there are other books to do as well. I have tried different books that say they are like this one but they weren't and it was disappointing. Really glad for this one. Thanks

This book contains 100 Japanese Puzzles created by LOGI, the leading Polish puzzle publisher. Inside you will find 100 beautiful puzzles with unique solutions, of five difficulty levels. Size of the puzzles - from 15x15 to 35x40. Japanese puzzles are a kind of very addictive logic puzzles, in which you have to paint some fields following the numbers and you will see that the fields will form an image. Reasons to like Logi puzzles: Each puzzle has only one solution. Puzzles are tested by a computer program designed by Urszula Marciniak, a mathematician and puzzle lover. You can solve puzzles using only logical thinking - no guessing is needed. The program is designed so that it uses only human kind of thinking. So even if a puzzle has only one solution, the program can reject it, because human will not be able to solve such puzzle without guessing and finding contradictions. This is what makes Logi puzzles enjoyable to solve. Puzzles are created by professional graphic designers. We have very high standards for graphics. We don't accept all images, they have to fulfill certain conditions, like no empty lines, clarity, and many other. We set five difficulty levels. The levels are set by a computer program, so they are always objective and the same. No repeating puzzles. The puzzles you see in this book are not published in any other non Polish language book. They were only published in our Polish monthly magazines available in Polish press stores or in online store at our website. We publish puzzles since 2004 - we know well what puzzlers like. If you have problems with solving a puzzle send it to us and we will show you a next step. Although puzzlers prefer to solve puzzle alone to feel proud, sometimes a small tip can be very helpful. We provide such help all the time for Polish puzzlers. If you are new in puzzles you can check our website for tutorials www.logi-puzzles.com. Go to the Friday Online Mix section and click below a specific puzzle to see tips and tricks. The person who takes care of Logi's high quality is Urszula Marciniak - the founder of Logi. Mathematician, photographer, a puzzle fan.
