Great Guide to Improvement By 14700Shopper Will clearly improve tactics for the intermediate player. Easy to read and follow suggestions. Lots to remember. Many competent players are frustrated by an apparent inability to score well at duplicate pairs. No matter how hard they try, the secret of success seems to lie forever beyond reach. The truth is that playing good bridge is not enough to win at pairs. The regular winners are those who have learned to adapt their strategy to take account of the vagaries of match-point scoring. A small shift in emphasis can make a big difference to results. In this book Australian expert Ron Klinger shows you how to do it. There are five sections covering constructive bidding, competitive bidding, opening leads, declarer play and defence, and they are full of well-chosen example hands and sound advice. Put these tips into practice and your results are sure to improve.
