Check your computer first but this is great!By R TistMy 12 year old devoured this book and has already written his first mod (longhand on paper) just 2 weeks after Christmas. Now he only needs a computer powerful enough to run it on. (Be forewarned, your home computer might not be enough for programming mods - my computer programmer husband explained this to me.)0 of 1 people found the following review helpful. potential but lacking a lotBy Julian John LavoieI have run into many hiccups with this book and there is no forum to ask questions. There's no way to contact the author. The website associated with the book looks like a

child wrote it. There's so little to work with that if you don't know anyone who knows about networking it's not worth buying this book. If there was a forum to ask questions this book may be worth it0 of 2 people found the following review helpful. One StarBy NataliegI tried to follow directions which did not work so I sent it back
