Innovate Media : Amazing Minecraft House Designs: With Step-by-Step Instructions before purchasing it in order to gage whether or not it would be worth my time, and all praised Amazing Minecraft House Designs: With Step-by-Step Instructions:

1 of 1 people found the following review helpful. Misleading title, borderline false advertising.By Dustin E Brubaker"Step By Step Instructions" is patently false. The majority of designs in the book contain a few screenshots, with a few pages of discussions of the thought process that went into creating them, but virtually nothing along the lines of how to actually build something similar. At the very end of the book, there are one or two extremely small

builds that include some step-by-step instructions. So, in a nutshell: If you are expecting lego-like instructions to build the castle on the front cover (as the title insinuates) you will be sorely disappointed. If you are interested in the author discussing his creations like an abstract painter would his masterpieces, then you *might* find this interesting. In short, don't waste your money. 1 of 1 people found the following review helpful. Utter Waste of TIME and MONEY - I got free and it still cost too much! By InfoHound I only just started with Minecraft, my 12 year old got me started. I found this book worse than useless, I would want my money back if I had paid for it, I would like a refund of the time I wasted reading, less than 5 minutes, but they were my five minutes. Having a background in Architecture, I thought this might be useful. Step by step? Does not even qualify as guidance for an out house. If you are going to try and sell a guide or how-to book, read a couple to find out how it's done and then try. This is a money grab not a book. If you want to learn to build buildings in Minecraft, find another book, this one is useless. At \$3.99 it's only \$5.00 over priced. Yes they should pay you to waste your time looking at it. 0 of 1 people found the following review helpful. IS DAT HEROBRINE IN THE BACKGROUND?!? By Flamethevamp hog I'm like "time to read minecraft books" so I read this one and I'm like "whoa, I must read more" when I'm done I'm like "whoa, wait. Was DAT HEROBRINE IN THE BACKGROUND!?!?" I love the book, but I swear I saw herobrine in the background.
