Analyzing Performance provides conceptual tools for understanding a range of performance, including theater, dance,

cinema, other audiovisual media, and mime. This richly illustrated book develops protocols for the analysis of performance at every level -- from the minute gestures and facial expressions of an actor to the social network in which theater is embedded -- and respects the importance of every aspect of performance, including actor, costume, space, time, music, and lighting. With a keen awareness of the roles of social context in the interpretation of performance, Patrice Pavis leads the reader from a purely formal analysis to a semiology and anthropology of performance, where spectator and actor are equally objects of study. Drawn from performance traditions and innovations all over the world, the book's many examples make critical techniques vivid and concrete.

Language NotesText: English (translation) Original Language: FrenchAbout the AuthorPatrice Pavis is Professor, Paris-VIII University. David Williams is Professor of Theatre, Dartington College of Arts, Devon, England.
