Looks exciting/ can't wait to study all the details! By Peggy M. Stavropoulos So many details in this book, the sky's the limit as to where all the clues may be hidden. I bought this book for my kids to challenge their imagination, but it would be a challenge for any adult. This book is beautifully written and illustrated as just a story book/ face value/ even if not used as a treasure map! 0 of 0 people found the following review helpful. Enjoyable for me and my grandchildren By Karla Armitage I bought the audio book and really liked it. My grandchildren usually are too rambunctious in the car, especially if the trip is very far. They are 10 and 11 years old. We put this audio book in during our trip from CA to WA and they were mesmerized. That made it worth it's weight in gold. Karla Armitage
