David Allen Sibley : Sibley Backyard Birding Flashcards: 100 Common Birds of Eastern and Western North America before purchasing it in order to gauge whether or not it would be worth my time, and all praised Sibley Backyard Birding Flashcards: 100 Common Birds of Eastern and Western North America:

102 of 102 people found the following review helpful. A closer look at the cards themselves. By Kim Beautiful set! I struggled to see the item before purchase but wanted to post pics that are on Sibley's site. His work is just magnificent. See photos attached of cards up close. 10 of 10 people found the following review helpful. Wonderful for children! By Bethany Hayes I purchased this set for my 6 year old who has recently become an avid bird watcher. Instead of leaving them as individual cards, I punched holes in them and use binder clips so now she can flip through the cards without losing any of them. The pictures of the birds on the front of the cards are beautiful with details to look for to identify

the birds. The back of the cards have the name of the birds, where they are frequently found, and random information about the bird. For anyone who is a bird watcher, these are a wonderful gift or, like our case, a great addition for nature studying during homeschooling. 6 of 6 people found the following review helpful. Nice, compact resource for backyard bird identification despite limited number of species
By Hammy Lady
Wonderful flashcards with beautiful illustrations and great identification information; included in a nice storage box. Only drawback is the limited number of species. Obviously, with the thousands of species living and/or migrating to or from North America, it is virtually impossible to have a set with every bird species. However, it would be nice to have more waterfowl included as we live along the Pacific Flyway and see many different ducks and geese. Maybe another set of cards featuring North American waterfowl?

From leading ornithologist David Sibley, this flashcard deck is designed for the beginner and backyard bird watcher. The Sibley Field Guide to Birds is now transformed into 100 easy-to-reference cards housed in one handsome pull-drawer gift box. Divided into one stack of 50 common Western and Eastern North American birds, and one stack of 50 common birds found across North America, each card features precise illustrations and text concerning habitat, behavior, and voice description necessary for easy identification. Edited with the backyard birder in mind, each bird card is accompanied with a regional map as an additional guide to migratory patterns.

About the Author
DAVID SIBLEY is a leading ornithologist and author of the essential Sibley Birding Field Guides. He began his career illustrating personal field guides before publishing his successful series. The author lives in Concord, Massachusetts, with his wife and two children.
