**Conceptis Puzzles : Two-Color Paint-doku** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Two-Color Paint-doku:

10 of 11 people found the following review helpful. Lots of fun! By Shannon B. I am an avid anything-doku fan, so this book peaked my interest from the first time I saw it on the shelf. I do multicolor picture puzzles on a regular basis, so I'm not a beginner. This book has lots of variety, and most of the time, you can tell what it is before you finish! I'm excited that I'm being challenged by each puzzle, and have only had to erase sections a few times. The colors used in here are repeated, so there's no need for a ton of pencils. I have a baggie with the 8 or 9 colors that are used, and I keep it around with the book. I am 45 puzzles in, and just getting to the long sideways ones. The only complaint I have is that sometimes the pencil lead rubs onto the other side when the book is closed, but not enough to cause a problem. To advanced enthusiasts, this is a keeper. One puzzle can take anywhere from 1-3 hrs, depending on your skill and attention! To beginners, it may be a challenge, but once you get going, you will have a ton of fun! The spiral binding makes it easy to fold in half when working on, or laying flat, depending on how you like to do the puzzles. The paper is good quality, even after erasing sections. One of my favorites so far! 1 of 1 people found the following review helpful. Great puzzles By Ajean Veasse This is a very nicely put together book of puzzles - so far they have been nicely

challenging but not impossible. I like that different puzzles use different colors for the second tone, it gives the book a very nice feel. The paper is good and the spiral binding makes working both sides easy. The only downside is that the puzzles have no marker by them indicating level of difficulty, but it is otherwise so nice I'll give it a pass on that. Overall a very nice puzzle book.0 of 0 people found the following review helpful. Great addictionBy SelahGreat challenge, awesome pictures too. I recommend grabbing some Pilot Color Eno pencils to go with this.

Picture-perfect logic puzzles . . . in vibrant two-color! Now, when you're cracking a code to solve a conundrum, you're also creating art. Simply use the numbers around the gridsome in color, some in blackto guide you as you fill in the squares. Gradually an image will emerge, and you'll be rewarded with a completed picture by the end. Not only do these puzzles sharpen logical thinking and cognitive skills, they're tons of fun!
