We did,By Kevin BethelWhat else can we build?What else did we build?What else should we build?What else will we build?1 of 1 people found the following review helpful. Three StarsBy Customervery technical. more history than desired.1 of 1 people found the following review helpful. Really a good book.By morgan hallThis book will really get you thinking and wondering if you're a "mushroom" and in the dark or just what is going on up there (and here on Earth). Really a good book.

The authors of Civilization One return, bringing new evidence about the Moon that will shake up our world. Christopher Knight and Alan Butler realized that the ancient system of geometry they presented in their earlier, breakthrough study works as perfectly for the Moon as it does the Earth. They found a consistent sequence of integer numbers that they can apply to every major aspect of the Moon; no such pattern emerges for any other planet or moon in the solar system. In addition, Knight and Butler discovered that the Moon possesses few or no heavy metals and has no coresomething that should not be possible. Their persuasive conclusion: if higher life only developed on Earth because the Moon is exactly what it is and where it is, it becomes unreasonable to cling to the idea that the Moon is a natural objectan idea with profound implications.

About the AuthorChristopher Knight has written five very successful books. His first book, The Hiram Key, co-authored with Robert Lomas, was published in 1996 and it immediately went into the UK top ten, bestseller list and remained there for 8 consecutive weeks. It has since been translated into 37 languages and sold over a million copies worldwide, becoming a bestseller in several countries. Alan Butler, a qualified engineer, but always fascinated by history made himself into something of an expert in astrology and astronomy. He has published four successful books on the Knights Templar and the Grail legend. He is also a published playwright and a very successful radio dramatist. They are co-authors of the best selling Civilization One.
