Tetsuya Miyamoto, LLC KenKen Puzzle : Will Shortz Presents I Can KenKen! Volume 3: 75 Puzzles for Having Fun with Math before purchasing it in order to gage whether or not it would be worth my time, and all praised Will Shortz Presents I Can KenKen! Volume 3: 75 Puzzles for Having Fun with Math:

1 of 1 people found the following review helpful. Math Puzzles for Kids!By NM MomThis is a terrific book of math

puzzles for kids. They start of easy (using only the numbers 1, 2, 3) and get harder (using the numbers 1-6). I bought this for my 9-year-old to keep his brain active over the summer. It arrived today, and he LOVES it! I'm going to have to buy him volumes 1 and 3, too. These puzzles are great for problem solving and critical thinking. The puzzles are similar to sudoku (sp?), but not quite the same. It says this book is for kids ages 9-12, but I think my son could have done these when he was 7 or 8. He has an EXTREMELY mathematical mind. If your child is older (11-12) and also has a mathematical mind, you might try some of the kenken books for adults. I highly recommend this book!0 of 0 people found the following review helpful. Not really KenKenBy CustomerIt may be good for beginners, but all of its puzzles use only multiplication. I was annoyed that the "sample" never got to an example of the book's direction. I intended it for a young teen but had to give it to a younger sibling.2 of 2 people found the following review helpful. Addictive puzzles!By dogbaitPurchased this for my wife who loves word puzzles and Sudoku. Recommend starting with the easier ones first till you get the hang of it and then move to the harder ones. If you like Sudoku, good chance you will like these also. Okay honey, I wrote your review, now can I have supper?

Not only are these puzzles fun but KenKen helps children improve concentration, logic and arithmetic skills. Children ages 9-12 have excelled in math and gained real-life problem solving skills all from playing a puzzle so engaging that it keeps them coming back for more. This third volume of I Can KenKen features: 75 easy addition and subtraction puzzles Introduction and how to solve instructions from Marilyn Burns "Home and Classroom Guide for Parents and Teachers" by Ms. Burns Forward by Will Shortz

About the AuthorTETSUYA MIYAMOTO, the creator of KenKen, is a math teacher who runs a unique mathematics class for grade school children in Japan where he practices "The Art of Teaching Without Teaching." His teaching method and use of KenKen in his classroom has proven extremely successful. His students regularly go on to be accepted at the most prestigious schools in Tokyo.WILL SHORTZ has been the crossword puzzle editor of The New York Times since 1993. He is also the puzzlemaster on NPR's Weekend Edition Sunday and is founder and director of the annual American Crossword Puzzle Tournament. He has edited countless books of crossword puzzles, Sudoku, KenKen, and all manner of brain-busters.MARILYN BURNS is a National Mathematics Educator and the author of the best selling The I Hate Mathematics! Book. Additionally, Ms. Burns has created the "Math Solutions" courses attended nationwide by more than 60,000 teachers and administrators.
