Dezo Hoffman was the first professional to photograph the Beatles. These photographs are from the time before their first record through all the years of the "Fab Four" and "Beatlemamia", from someone who became their friend and advisor. I love having this book and the "Remember" book by Michael McCartney, Paul's brother. Between the two, you really get an insight into what was happening with them, and in the world of music, and what a transformation they were about to initiate in the world of music. Even if you weren't a fan, you find out why there was such a change in music after the Beatles came to America, and the rest of the world. There are many books out there about the genius of each one in their writing, producing, and playing, but this gives you that behind the scenes look at four boys who had no idea that they were about to change the world!0 of 0 people found the following review helpful. I love this bookBy Ernest T. JulianBeing a Beatles fan since 1964 as well as owning four Hofner basses and playing in many Beatle groups since 1965, I love this book.Lots of great pictures as well as all the history of the group that changed musical history forever that will never be duplicated.This is one book I had to add to my collection.A must to own.0 of 0 people found the following review helpful. Awesome! Better than advertised +++By CustomerAwesome! Better than advertised +++

A timeless record of the Fab Four at the height of Beatlemania, as seen through the lens of Dezo Hoffmann.
